

***SGH Proceedings* Selected for Indexing in EMBASE**

The *SGH Proceedings* has been selected for indexing in EMBASE. Along with Compendex, Geobase and Scopus, EMBASE is one of the databases under Elsevier's Bibliographic Databases.

The Editorial Committee appreciates the support departments on the Outram campus have shown for the journal, be it as authors, reviewers, or Editorial Committee members past and present. The Committee is thankful for their contribution towards the journal's successful application for indexing.

Coverage in the databases will help attract traffic to articles published in the *SGH Proceedings*. I hope that

this will encourage a higher level of contributions to the journal, which will in turn further raise the standard of the journal.

In addition, commencing with *SGH Proceedings Volume 14 Number 1 2005*, the full text of articles published in the journal will be made available on the SGH internet. By using the internet to replace the current distribution format of printed copies, the journal can reach a wider readership.
