

An Invitation to
Pain Management
360°

Organised By:

Pain Management Centre
Block 6 Level 2 Singapore General Hospital Singapore 169608

In Partnership With:

Dear Friends and Colleagues,

It gives me great pleasure in welcoming you to our General Practitioner CME organized by the Pain Management Centre in Singapore General Hospital.

We decided to set the theme, Pain Management 360°, this time round as the talks included encompasses an all round multi-faceted view, with an emphasis on the multi-pronged approach in Pain Management. We are going back to basics on the practical aspects of using the various multitude of medications used in managing Pain, including commonly used analgesics and adjuvants, such as neuropathic pain medications. Common systemic illnesses frequently associated with pain, such as Diabetes and Parkinsonism, which are seen in the general practice, will also be explored. Finally, the afternoon will culminate in a balanced view, with talks covering Interventional Pain Procedures as well as non-pharmacological approaches in the management of Pain.

The stage is set and we welcome you once again in joining us in this stimulating session with a 360° view of Pain Management

Dr Tan Kian Hian
